

MATTEO CURCIO

EVENTS CONTENT PRODUCER

I have been working between **Europe** and **UAE** as a **Creative Content Producer**, supervising the content development and production for small to large-scale events, from concept through delivery: large-format video content and mapping, music & sounddesign, activations, interaction design, data visualization.

With a technical background in pro-audio and video deployments, and a creative background in video and audio production for TV, cinema and radio advertising, post-production and motion graphics, I can supervise a succesful event from both a technical and artistic standpoint.
